

Alpine MusicSafe Classic[®] professional hearing protection for musicians

Musicians run a considerable risk of a permanent hearing damage. Too loud music can lead to a serious hearing loss and other physical problems. For a perfect protection during repetitions, concerts and other loud music events, the MusicSafe Classic[®] has been developed.

MusicSafe Classic[®] contains two different and exchangeable sets of music filters with outstanding sound characteristics with medium and high attenuation rates. These special music filters guarantee an optimal protection without loss of clarity, while at the same time you can perfectly enjoy the music.

Sound levels of music		
Normal piano practice	60- 70	dB
Chamber music, small auditorium	75- 85	dB
Piano Fortissimo	84- 103	dB
Violin	82- 92	dB
Trombone	85- 114	dB
Symphonic music peak	120-137	dB
Amplifier rock, 4-6'	120	dB
Rock music peak	150	dB

THE SPECIAL KEYFEATURES OF THE MUSICSAFE CLASSIC[®]

- * The earplugs are very comfortable to wear
- * Thanks to their compact size, the earplugs are hardly visible in the ear
- * The special attenuation filters offer an excellent sound quality
- * The supplied storage and travel box makes sure that the earplugs are always carried with you and helps keeping them clean in a very hygienic way

Product specifications

The MusicSafe Classic earplugs are produced from a very soft flexible and durable thermoplastic material. Due to the warmth of the ear it adapts to the shape of the auditory duct. Therefore the MusicSafe Classic is very comfortable to wear. MusicSafe Classic earplugs with special music filters are an open system, so that one has no feeling of isolation. The MusicSafe Classic is supplied with white earplugs.
