

A real revolution !

REVO 1

At last! A keyboard designed to enhance musical expression and the pleasure of travelling on the stage and even circulate through the audience. The keyboard player can share his musical expression with everyone.

The integrated MIDI communication system, generally simplifies the use of the keyboard. This system gives great freedom of movement to the keyboard player for all kinds of shows.

Thanks to its ergonomic hub/support, the keyboard player is free in its movement and play positioning : 360 ° rotation, revolution control, adjustment of remoteness for the positioning of the hands.

Play in all simplicity:

No more hassles with connections, a wireless MIDI system is integrated into the standard keyboard.

A compact and mobile keyboard adapted to the playing habits of the keyboard player. Use of the 2 hands as on a standard keyboard.

Integrates easily with your existing equipment: traditional keyboards, and sound monitors.

Specifications:

- LCD display
- 4 assignable controller knobs
- Split layer function
- Octaves shift (± 4)
- Transposition by semitones (± 24)
- Rechargeable Batteries with 4 hours autonomy

Enjoy the real Live performance:

Thanks to its ergonomic support hub, the keyboard player is free in its movement and play positioning: 360 degree rotation, revolution control, control of audience visibility, adjustment of remoteness for the positioning of the hands.

A sleek look, compact and open which leaves all the place to the keyboard player towards the audience and which gives him the freedom of movement on stage and in the audience.

Integrates the control functions required to achieve live performances.

Facilitate the sound adjustment of the keyboard, by a better visibility of the keyboard play on the scene forefront.

An operation autonomy of more than 4 hours.
